Document notes: This knowledge base is structured with self-contained question-and-answer entries so that each entry can be retrieved independently by a retrieval-augmented generation (RAG) system. Organization name, person names, roles, and common question phrasings are intentionally repeated across entries to improve retrieval matching for queries such as "Who is the cybersecurity staff?", "Who works in cybersecurity?", and "What does Amal do?". All facts in this document are based on information supplied directly in conversation; no additional facts have been invented.
